DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

- (e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.
- 2. Claims 1, 7, 8, 10, 12-14 are rejected under 35 U.S.C. 102(e) as being anticipated by anticipated by Brankovic et al. (US 6,650,178) (hereafter Brankovic).

The applied reference has some common inventors with the instant application. Based upon the earlier effective U.S. filing date of the reference, it constitutes prior art under 35 U.S.C. 102(e). This rejection under 35 U.S.C. 102(e) might be overcome either by a showing under 37 CFR 1.132 that any invention disclosed but not claimed in the reference was derived from the inventor of this application and is thus not the invention "by another," or by an appropriate showing under 37 CFR 1.131.

Regarding claim 1, Brankovic discloses the claimed subject matter "I/Q-Demodulator comprising a n-port structure (1) being supplied with a RF signal (2) to be demodulated at a first input (3) and with a Second RF-signal (4) at a second input (5), and outputting n-2 signals (6) to power sensors (7), n being 4, 5 or 6, characterized by a multiplexing means (8) for multiplexing low-pass-filtered output signals (9) of the power sensors (7)" in Fig. 25, wherein element 757 disclose a "multiplexing means".

Application/Control Number: 09/901,273

Art Unit: 2634

Regarding claim 14, see claim 1 above.

Regarding claim 7, Brankovic further discloses "the n-port is a five-port-junction" in Fig. 27, element 701.

Regarding claim 8, Brankovic further discloses "the n-port is a four-port-junction (16) and the demodulator is a (M)QAM or (M)PSK demodulator" in Fig. 25; col. 20, lines 55-56.

Regarding claim 10, Brankovic further discloses "before or after the multiplexing means (8) at least one DC-amplifier (17) is provided" in Fig. 25, element 729.

Regarding claim 12, Brankovic further discloses "the n-port (1, 16), the power-sensors (7) and said multiplexing means (8) are integrated on one single chip (18)" in Fig. 25; col. 24, lines 37-38.

Regarding claim 13, see claim 8.

Allowable Subject Matter

3. Claims 2-6, 9, 11, 15-19 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Response to Arguments

4. Applicant's arguments filed on 01/12/05 have been fully considered but they are not persuasive.

In the REMARKS, page 10, applicants have argued that cited reference,

Brankovic does not disclose "plurality of power sensors". It is, however, noted that

Application/Control Number: 09/901,273

Art Unit: 2634

Brankovic clearly shows an "n-2" outputs supplied to a "plurality of power sensors" in at least Fig. 27, element 701.

Conclusion

- 5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
- 6. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Dac V. Ha whose telephone number is 571-273-3040. The examiner can normally be reached on 5/4.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Stephen Chin can be reached on 571-272-3056. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
